## ABOUT

Applied AI Engineer specializing in developing and deploying end-to-end AI/ML and custom solutions. Expertise includes LLMs (RAG, Fine-tuning), Deep Learning (CNN, RNN, Transformers), and cloud platforms like AWS and Azure. Proficient in key agent and orchestration frameworks, including LangChain, LlamaIndex, Multiple Agent Development Kit (ADK), and CrewAI. Proven track record of delivering high-impact systems, such as HR automation bots and production-ready RAG Q&A systems, utilizing Python and FastAPI for scalable AI agent orchestration.

## EDUCATION

### United Institute of Technology

Bachelor of Science - AI/ML; GPA: 7.5

Gandhinagar, India

September 2022 - April 2026

o **Courses:** Artificial Intelligence, Machine Learning, Networking, Cloud Computing, Databases, Operating Systems, Data Structures

## SKILLS SUMMARY

**Languages:** Python, SQL, R, C++, Rust, Cypher Query Language  
**AI/ML:** Neural Networks, Fine-tuning, LLM, RAG, CNN, RNN, Transformers  
**Frameworks:** TensorFlow, PyTorch, Keras, Scikit-learn, Langchain, Hugging Face, FAST API  
**Data Tools:** Power BI, Tableau, RStudio, Excel, Jupyter, WEKA, Pandas  
**Databases:** PostgreSQL, MySQL, ChromaDB, Vector DB, Data Warehouse  
**DevOps:** Docker, GIT, AWS, Azure, Apache HTTP Server, Postman  
**Soft Skills:** Leadership, Communication, Critical Thinking, Problem Solving, Team Work, Time Management

## EXPERIENCE

### Dealberg

Joint AI lead

Bangalore, On-Site

December 2025 - Present

o I design, build, and deploy AI-powered systems and automation tools—handling backend architecture, integrations, and client-facing product delivery end-to-end.

### Rysyth technologies

Applied AI Engineer

Ahemdabad,Hybrid

July 2025 - December 2025

o Building end-to-end AI powered application for clients based on their needs.

### Zensible

AI Engineer

Bangalore, Hybrid

April 2025 - July 2025

o Built AI applications delivering business value; Created HRMS bot for HR automation and employee chat-based queries.

### Amaze Inc

AI Consultant

Bangalore, On-Site

January 2025 - April 2025

o Transformed complex datasets into strategic insights and architected custom AI solutions for data-driven decisions.

### Brand Shark

AI Engineer Intern

Bangalore, On-Site

November 2024 - January 2025

o Analyzed and visualized data, delivered actionable insights to support business decisions.

## PROJECTS

**LiveKit Voice Agents:** Production-grade real-time voice AI system built on WebRTC (UDP) achieving sub-500ms latency using VAD + semantic turn detection, preemptive LLM generation, and optimized STT→LLM→TTS streaming pipeline.

**SmartAssist:** Enterprise-scale RAG system on AWS leveraging Texttract, OpenSearch embeddings, and Bedrock (Nova Pro), with ECS auto-scaling, CI/CD pipelines, and IAM-secured microservices architecture.

**HR AI:** Full-stack AI-powered HR platform with context-aware chatbot, multi-session memory, and real-time WebSocket streaming, enabling personalized employee workflows like leave, attendance, and payroll queries.

**Medi:** Scalable medical AI backend integrating LLM-driven QA agents, secure document pipelines, and Azure services (Cognitive, Blob, DB) for compliant healthcare data handling and intelligent retrieval.

## CERTIFICATIONS

**Complete Generative AI Course With Langchain and Huggingface** - Udemy (November 2025)

**LLM Applications With Prompt Engineering** - NVIDIA (October 2025)

**AI Automation: Build LLM Apps & AI-Agents with n8n & API's** - Udemy (July 2025)

**AWS AI Practitioner** - Udemy (2025)

**Neo4j Certified Professional** - neo4j (2025)

**Azure AI Fundamentals** - Udemy (October 2025)

**Supervised Machine Learning: Regression and Classification** - DeepLearning.AI (June 2024)

**Data Processing and Manipulation** - University of Colorado Boulder (June 2024)

**Ethical Hacking** - NPTEL (October 2023)
